MSSP Alert

A CyberRisk Alliance Resource

Top 250 MSSPs

Welcome to the Top 250 MSSPs 2022 Edition. The research and rankings leverage MSSP Alert's sixth annual worldwide survey of MSSPs (conducted April through August 2022) along with MSSP Alert's editorial coverage.

The resulting rankings are based on:
- **Annual recurring revenues**
- **Profitability**
- **Business growth rate**
- **Cyber professional headcount**
- **Managed security services offered**
- **MSSP Alert's editorial coverage of MSSPs worldwide**
- **Third-party industry honors (i.e., Gartner, Forrester, IDC, etc.)**

Executive Summary: The Top 250 MSSPs and associated survey participants continue to grow faster than the overall managed security market. Indeed, survey participants expect to grow annual MSSP revenues 26% in 2022 vs. 2021 – which is nearly double the market growth rate.

Multiple market trends are fueling MSSP growth. Examples include:

> The global cyber talent shortage across enterprise, mid-market and small organizations.

> The shift from manual, in-house cybersecurity processes to automated, outsourced processes that MSSPs manage.

> For-profit supply chain cyberattacks and ransomware events that demand third-party mitigation services.

> Hybrid work and remote work business models, which have increased end-customer demand for security monitoring.

> Heightened nation-state attacks and geopolitical events such as Russia's invasion of Ukraine, which potentially threaten all Internet connections.

Meanwhile, multiple cybersecurity market segments are evolving and converging to address these new MSSP realities. Examples include:

> **MSSP and MSP Partnerships**: Small MSPs generally provide basic endpoint and data protection services, but they increasingly lean on full-blown, pure-play MSSPs to deliver MDR, incident response, SOC and other advanced services.

> **M&A**: Forty-five major MSSP mergers and acquisitions M&A occurred from January 2022 through August 2022, compared to 22 M&A transactions during the corresponding period in 2021. M&A deals typically involve MSSPs seeking to expand regional footprints, grab talent or obtain skill sets in fast-growth areas such as XDR.

> **Private Equity Investments**: PE firms continue to acquire MSSPs. Active buyers in 2022 so far include Investcorp Technology Partners (ITP) and Lee Equity Partners, among others.

> **MSSP, MDR and XDR Convergence**: MSSPs and cybersecurity software companies continue to extend beyond MDR toward XDR-related services. The result involves occasional competition between the MSSP, MDR and software providers.
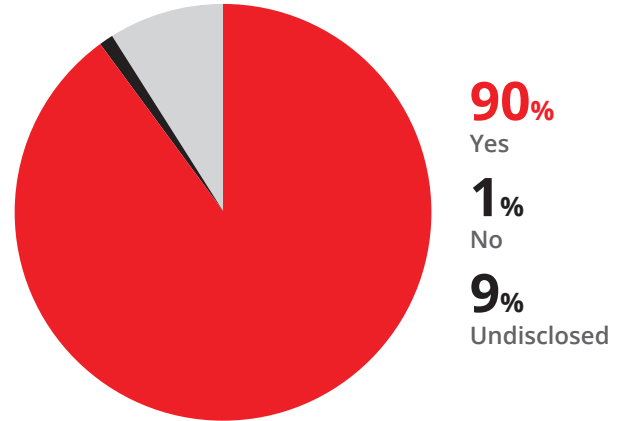

MSSP Alert continues to cover those trends and more on a daily basis.

MSSP Alert generally adheres to Gartner's definition of an MSSP, broadly defined to include companies that offer one or more of the managed security services above. The bar chart represents the percentage of MSSP Alert survey participants offering each service – either directly or via partnerships.

The Top 250 MSSPs are headquartered in 30 different countries, up from 26 countries in our 2021 report. Most survey participants are headquartered in the United States (67%) followed by the United Kingdom (7%), Canada (3%) and India (4%), though MSSP activities for each survey participant frequently extend beyond country borders.

What type of security attacks and/or incidents has your MSSP mitigated for customers in 2022?

These attacks weren't necessarily successful attacks. Rather, the data represents the attack vectors that prompted an MSSP response for end-customers.

Average MSSP Revenue

Most MSSPs participating in our annual survey generate less than $5 million in annual cybersecurity revenues. However, revenues from the largest MSSPs greatly lift the overall survey results. Survey participants expect to grow managed security revenues about 26% in 2022 vs. 2021, which exceeds the growth rate in our 2021 report.

Security Operation Centers
How do you run and manage your security operations center?

The percentage of MSSPs running SOCs completely in-house vs. hybrid SOC models has remained largely steady in recent years. Generally speaking, larger MSSPs often have their own SOCs, while small MSPs typically run hybrid or completely outsourced SOC models.

Top Cybersecurity Vendors Assisting MSSPs

MSSP Alert survey participants were asked to describe which three vendors most greatly assist their managed security services efforts. The 10 most-mentioned vendors are listed below. In a continued sign of market fragmentation, survey participants mentioned 140 different hardware, software, cloud, distribution and services vendors that assist their cybersecurity efforts.
